**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

# 21<sup>th</sup> International Configuration Workshop

Proceedings of  
the 21<sup>th</sup> International Configuration Workshop

*Edited by  
Lothar Hotz, Michel Aldanondo, Thorsten Krebs*

September 18 – 19, 2019

Hamburg, Germany

Organized by

University of Hamburg  
Hamburger Informatik Technologie-Center e.V.  
Department of Computer Science  
Vogt-Kölln-Str. 30, 22527 Hamburg  
GERMANY

ISSN 1613-0073

Lothar HOTZ, Michel ALDANONDO, Thorsten KREBS, Editors  
Proceedings of the 21<sup>th</sup> International Configuration Workshop  
September 18-19, 2019, Hamburg, Germany

## Chairs

*Lothar Hotz*, University of Hamburg, HITeC, Hamburg, Germany  
*Michel Aldanondo*, Toulouse University, Mines Albi, France  
*Thorsten Krebs*, encoway GmbH, Bremen, Germany

## Program Committee

*Michel Aldanondo*, Toulouse University, Mines Albi, France  
*Tomas Axling*, Tacton Systems, Denmark  
*Andrés Felipe Barco*, Universidad Santiago de Cali, Colombia  
*David Benavides*, University of Seville, Spain  
*Andreas Falkner*, Siemens AG, Austria  
*Alexander Felfernig*, Graz University of Technology, Austria  
*Cipriano Forza*, University of Padova, Italy  
*Gerhard Friedrich*, University of Klagenfurt, Austria  
*Paul Grünbacher*, Johannes Kepler University Linz, Austria  
*Albert Haag*, Product Management GmbH, Germany  
*Alois Haselböck*, Siemens AG, Austria  
*Petri Helo*, University of Vaasa, Finland  
*Lothar Hotz*, University of Hamburg, HITeC, Germany  
*Dietmar Jannach*, University of Klagenfurt, Austria  
*Thorsten Krebs*, encoway GmbH, Bremen, Germany  
*Tomi Männistö*, University of Helsinki, Finland  
*Mikko Raatikainen*, Aalto University, Finland  
*Rick Rabiser*, Johannes Kepler University Linz, Austria  
*Sara Shafiee*, Technical University of Denmark, Denmark  
*Markus Stumptner*, University of South Australia, Australia  
*Juha Tiihonen*, University of Helsinki, Finland  
*Elise Vareilles*, Toulouse University, Mines Albi, France  
*Yue Wang*, Hang Seng Management College, Hong Kong  
*Linda Zhang*, IESEG Business School of Management Paris, France

## Local Arrangements

*Lothar Hotz*, University of Hamburg, HITeC, Germany  
*Evelyn Staske*, HITeC, Germany

## Preface

Configuration is the task of composing product models of complex systems from parameterisable components. This task demands for powerful knowledge-representation formalisms to capture the great variety and complexity of configurable product models. Furthermore, efficient reasoning and conflict resolution methods are required to provide intelligent interactive behavior in configurator software, such as solution search, satisfaction of user preferences, personalization, or optimization.

The main goal of the Configuration Workshop is to promote high-quality research in all technical and application areas related to configuration. In this year, besides typical contributions about knowledge representation and reasoning in configuration, adaptation and re-configuration of delivered products is a one focus.

The workshop is of interest for both, researchers working in the various fields of Artificial Intelligence (AI) technologies as well as industry representatives interested in the relationship between configuration technology and the business problem behind configuration and mass customization. It provides a forum for the exchange of ideas, evaluations and experiences especially in the use of AI techniques within these application and research areas.

The 2019 Workshop on Configuration continues the series of workshops started at the AAAI'96 Fall Symposium and continued on IJCAI, AAAI, and ECAI since 1999. In recent years, the workshop was held independently from major conferences.

This year special thanks has to be given to following Configuration Workshop Sponsors: Siemens (Austria), Product Management Haag (Germany), Variantum (Finland), EventHelp (Austria), encoway (Germany), IMT Mines-Albi-Carmaux (France), HITeC (Germany), University of Hamburg (Germany)

Lothar Hotz, Michel Aldanondo, and Thorsten Krebs

September 2019

# Contents

## **Consistency Management**

- Coping with Inconsistent Models of Requirements 1  
*Juha Tiihonen, Mikko Raatikainen, Lalli Myllyaho, Clara Marie Lüders, and Tomi Männistö*
- Consistency-based Merging of Variability Models 9  
*Alexander Felfernig, Mathias Uta, Gottfried Schenner, and Johannes Spöcklberger*
- Conversational Recommendations Utilizing Model-based Reasoning 13  
*Oliver Tazl, Alexander Perko, and Franz Wotawa*
- Decision Biases in Preference Acquisition 20  
*Martin Stettinger, Alexander Felfernig, and Ralph Samer*

## **Product and Service Configuration**

- Enrichment of Geometric CAD Models for Service Configuration 22  
*Daniel Schreiber, Lukas Domarkas, Paul Christoph Gembarski, and Roland Lachmayer*

## **Applications and Benefits**

- smartfit: Using Knowledge-based Configuration for Automatic Training Plan Generation 30  
*Florian Grigoleit, Peter Struss, and Florian Kreuzpointner*
- Prioritizing Products for Profitable Investments on Product Configuration Systems 38  
*Sara Shafiee, Lars Hvam, and Poorang Piroozfar*
- A Search Engine Optimization Recommender System 43  
*Juan Camilo Duque Delgado, Christian David Hoyos, Andrés Felipe Barco Santa, and Elise Vareilles*
- Comparing the Gained Benefits from Product Configuration Systems 48  
*Sara Shafiee, Lars Hvam, and Anders Haug*

### **Configuration Requirements**

Reusing Components across Multiple Configurators 53  
*Amartya Ghosh, Anna Myrodi, Lars Hvam, and Niels Henrik Mortensen*

Adaptive Autonomous Machines – Requirements and Challenges 61  
*Lothar Hotz, Stephanie von Riegen, Matthias Riebisch, Markus Kiele-Dunsche, and Rainer Herzog*

Constraint Solver Requirements for Interactive Configuration 65  
*Andreas Falkner, Alois Haselböck, Gerfried Krames, Gottfried Schenner, and Richard Taupe*

### **Configuration and Standards**

Portfolio Management: How to Find Your Standard Variants 73  
*Frank Dylla, Daniel Jeuken, and Thorsten Krebs*
